AWS CLOUD & DEVOPS ENGINEER

Professional Summary

AWS Cloud & DevOps enthusiast with hands-on experience in EC2, S3, IAM, VPC, Elastic Load Balancing and CloudWatch. Familiar with Linux administration, Git, Docker, CI/CD concepts and infrastructure automation. Passionate about building secure, scalable and highly available cloud solutions.

Education

B.Com Computer Applications

The American College, Madurai (2021–2024)

Technical Skills

AWS: EC2, S3, IAM, VPC, CloudWatch, ELB, Auto Scaling, Route 53 (Basic)

DevOps: Linux, Git, GitHub, Docker, Jenkins, Terraform (Learning)

Web: HTML, CSS

Projects

AWS Highly Available Web Application

- Deployed multiple EC2 instances across AWS infrastructure.
- Configured Elastic Load Balancer for traffic distribution.
- Implemented IAM users, roles and security permissions.
- Monitored application health using CloudWatch.

AWS S3 Static Website Hosting

- Hosted a static website using Amazon S3.
- Configured bucket permissions and public access settings.
- Managed secure and reliable content delivery.

Dockerized Web Application Deployment

- Created Docker images and containers for a sample web application.
- Simplified deployment and environment consistency.

CI/CD Pipeline with Jenkins

- Integrated GitHub repository with Jenkins.
- Automated build and deployment workflows.
- Reduced manual deployment effort.

Certifications

- AWS Certified Cloud Practitioner (Pursuing)
- Linux Fundamentals
- Git & GitHub Fundamentals

Core Competencies

Cloud Infrastructure • Monitoring • Troubleshooting • Security Best Practices • Automation • Team Collaboration • Problem Solving
